About Us

We specializing in NX/Unigraphics CNC programming & manufacturing support. Built on the pillars of manufacturing best practices, effective information security controls and ease of business. 1st Peak is changing the paradigm in manufacturing support by rejecting the traditional contractor work model. We understand our customer's goals and invest in their success by aligning the right resources to meet their objectives. Our revolutionary business model allows us to attract geographically diverse U.S. talent. We created a service that makes customer engagement easy and for us to bring some of the most highly skilled people in the country to our customer's manufacturing efforts.
